

► **Product benefits**

Safe, fast and easy

Tool-free assembly

Much faster to assemble than traditional screw systems
(construction 1 m/min according to own measurements)

No drilling or other attachments required

Large post spacing of 2.7 m reduces assembly time

Simple assembly in three steps

Meets all relevant standards: ► EN 13374:2018 Class A & Class B
► OSHA 1926.502

**You are safely protected

HÜNNEBECK EPS

The easy-to-install side protection system secures building edges safely and reliably.

Editor: Hünnebeck GmbH, Rehhecke 80, 40885 Ratingen. Drucknorm

At Work For You

Your safety comes first

HÜNNEBECK EPS is a patented and EN 13374-compliant (Class A&B) side protection system. It is used in building construction on each floor and protects against falling at the edge of buildings.

The system is quick and easy to set up, adaptable and versatile. It overcomes all the challenges of the modern construction industry. HÜNNEBECK EPS can also be used to secure stairwells, storage areas or as side protection for trench systems.

The HÜNNEBECK EPS grids can be used simply as standard side protection, double mounted on top of each other as increased side protection or triple mounted on top of each other as

complete enclosures. The innovative HÜNNEBECK EPS post allows the support to be braced between floor and ceiling without drilling.

Maximum side protection for all dimensions

Standard side protection

Increased side protection

Complete enclosure

The HÜNNEBECK EPS post: flexible and durable

The HÜNNEBECK EPS post covers a height of 3.4 m. In addition, an extra-long post up to 4.3 m is available.

Easy assembly, because the support is braced between floor and slab. No drilling into concrete required

All heights can be covered by the EPS coupling

Pressure mechanism withstands at least 2 million load cycles

Side protection possible in single, double and total height of the floor

Visible safety indicator indicates proper installation

The HÜNNEBECK EPS grid: more resistant and versatile side protection

▶ **Resistant grid** according to the requirements of EN 13374:2018 (Classes A & B)

▶ **High impact load** corresponds to the impulse a mass of 50 kg at a speed of 23.9 km/h

▶ **Long service life** thanks to strip galvanized steel materials with additional powder coating

HÜNNEBECK mains fuse

▶ **Meets** Class B1 for nets

▶ **Tested** by the Lloyds British Testing Institute for catching persons and materials

▶ **70 x 70 mm²** basic net with 20 x 20 mm² parts catching net support
